

## **Job Posting**

### **Production Technician- HVAC/Electrical**

K-O Concepts, Inc. has an open position for a production technician, to assemble and test recirculating coolant chillers. This position is for a full-time employee and is immediately available. Our work week is four days (Monday-Thursday) 10-hour shifts, with occasional opportunities for overtime on Friday.

Applicant must be qualified as either a HVAC or an electrical assembler. A qualified applicant must have completed an accredited vocational program with the following level of course work.

Refrigeration/HVAC Technician Program: ~1350 hours (NATE or equivalent)

or

Electrical Technician Program: ~ 1200 hours (NCCER or equivalent)

Experience in electrical assembly, refrigeration assembly, or the military is preferred. Mechanical aptitude and the ability to follow precise instructions are both a must have. Must be able to lift at least 50 pounds. This position needs to be filled by an applicant who can perform duties quickly with a minimal amount of training time and assistance.

K-O Concepts, Inc. is a manufacturing firm located in Titusville Florida. We have been designing and manufacturing precision recirculating coolant chillers for 25 years. For more information about our company please visit our website [www.k-oconcepts.com](http://www.k-oconcepts.com).

For more information, or to apply, please contact K-O Concepts via email ([mindy.ritz@k-oconcepts.com](mailto:mindy.ritz@k-oconcepts.com)) or by phone (407-296-7788). In addition to your resume you will be asked to provide curriculum information for any vocational programs completed and references.
